

**NFIRS**

We had 2,618 calls for service for the month of April. NFIRS reports were initially completed at a 91.1% rate with 2<sup>nd</sup> Shift leading the way with 93.7%, followed by 1<sup>st</sup> Shift with 92.2% and then 3<sup>rd</sup> Shift with 87.4%.

We had an initial NFIRS completion percentage for April of 91.1%.

1<sup>st</sup> Shift – 92.2%

2<sup>nd</sup> Shift - 93.7%.

3<sup>rd</sup> Shift – 87.4%.

Total Calls	790	867	799
Calls over Benchmark	76	75	122
% Over Benchmark	9.6%	8.7%	15.3%

These graphics show our Turnout times that fall in the 90th Percentile. As well as the percentage of Turnout times that exceed our current benchmark of 120 seconds, remember that our goal is 60 seconds for EMS calls and 80 seconds for Fire calls.

Easier explanation: For April, more than 90% of the time, 1st shift's turnout time is 1 minute 47 seconds, 2nd shift's turnout time is 1 minute and 43 seconds, and 3rd shift's turnout time is 2 minutes and 2 seconds. Times overall continue to show improvement. Keep up the good work.

April Turnout Times

Below is a chart showing an average monthly turnout time calculated per apparatus/per shift. We have excluded all non-emergency calls when calculating the average times. Day times are figured from 0800-2200 and 0700-0800. Night times are calculated from 2200 to 0700.

Time is critical in our business. It is easy to explain the time factor when we are responding to a structure fire. Lives often depend on our ability to get emergency responders on scene. Time is just a critical when we are responding to an emergency medical call. The American Heart Association shows very clearly the relationship between the time elapsed from out of hospital cardiac arrest to the arrival of advanced medical care. The National Fire Protection Association (NFPA) and the Center for Fire Accreditation International (CFAI) have developed industry standards and methods for gathering and interpreting this data.

KCKFD is gathering and sharing specific response time data in an effort to improve our service delivery and better serve our community. KCKFD is using FirstWatch Data Analytics to analyze our raw data and help us show our frontline personnel how they are performing.

NFPA 1710 identifies three time benchmarks:

Call receipt and processing time;

90% of the time, 60 seconds from receipt of call, including transfer time

Turnout time:

90% of the time, 60 seconds from the company level initial receipt of dispatch to the beginning of response time (wheels turning)

Response time

The time that begins when responding units are en route to the emergency incident (wheels rolling), and ends when responding units arrive on scene (wheels stopped at the address).

There are slight differences between Fire and EMS Response:

Deployment (Fire)

- Arrival of engine company in four minutes (240 seconds) and/or the full initial alarm assignment within eight minutes (480 seconds)
- Initial full alarm assignment meeting eight-minute (480- second) response time objective on 90% of all emergency incidents including an arriving company capability to implement an Initial Rapid Intervention Crew (IRIC)

Deployment (EMS)

- Turnout of personnel for response within one minute (60 seconds)
- First responder/AED level, within four-minute (240- second) response on 90% of all emergency medical incidents
- ALS response within eight minutes (480 seconds) on 90% of all ALS calls
- ALS response, two members at EMT-P level and two members at EMT-B level arriving on scene within the established response time

The Kansas City Kansas Department responded to **2621** incidents during the month of April 2019 based on CAD and NFIRS data.

Response Per EMS Unit

KCKFD EMS Units responded to an incident 1936 times in April 2019, 2150 times in March 2019 and 198 times in April of 2018. This number is generated by CAD and NFIRS data. If more than one unit responded, each unit is counted as a response, however the incident is counted only once for our total response count.

Response Per Suppression Unit

KCKFD Suppression Units responded to an incident 3033 times in April 2019 and 3153 times in March of 2019.

In April of 2018 we responded to 3077 incidents. This number is generated by CAD and NFIRS data. If more than one unit responded, each unit is counted as a response, however, the incident is counted only once for our total response count.

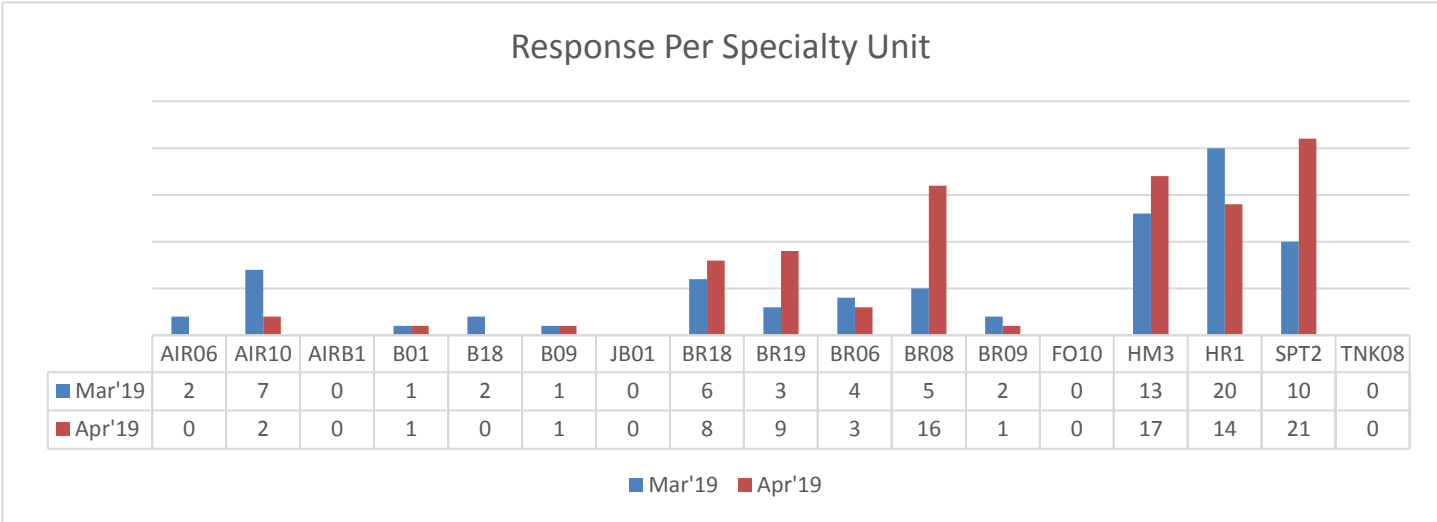

Fire Calls

KCKFD Suppression Units responded to a Fire call 751 time in April of 2019. In March of 2019 we responded to 782 Fire calls. In April of 2018 we responded to 777 Fire calls. This number is generated CAD and NFIRS data. These calls include:

- F A/A Business/ Multi Family - F A/A Business/ Multi Family
- F A/A Residence - F A/A Residence
- F Business/ Multi Family Fire - F Business/ Multi Family Fire
- F Controlled Burning - F Controlled Burning
- F Family Dwelling Fire - F Family Dwelling Fire

- F Vehicle Fire - F Vehicle Fire
- F Vicinity Alarm - F Vicinity Alarm
- Fire - Fire Residential
- Fire Brush Truck - Fire Brush Truck
- Fire Car - Fire Car
- Fire UTV - Fire Utility Vehicle

KCKFD Specialty Units responded to an incident 93 times in April 2019 and 76 times in March 2019. Our Specialty Units responded 86 times to an incident in April of 2018. This number is generated by CAD and NFIRS data. If more than one unit responded, each unit is counted as a response, however the incident is counted only once for our total response count.

KCKFD SUPPORT Units responded to an incident 352 times in April 2019 and 393 times in March 2019. This number is generated by CAD and NFIRS data. If more than one unit responded, each unit is counted as a response, however the incident is counted only once for our total response count. In April we began using new Support Unit numbers. In particular, our Fire Investigators used to be tracked by the shift the worked, ie. 1<sup>st</sup> shift investigator was Car 81, 2<sup>nd</sup> shift was Car 82, etc. Going forward all responses by a shift investigator will be calculated as Car 180, regardless of shift. Many of our chief officers respond to incidents, they will be included in the monthly report if their responses are of note.

Calls by station territory are determined by first due territory response. Apparatus often respond to incidents in first due territory other than their own. For example: If Pumper 20 responds to an incident in Pumper 19's first due territory, the activity will be reflected in Pumper 20's Response per Suppression Unit but in Station 19's Response by Station Territory. Note: The 170 non-emergency transfers from PMC and KUMC, which elevate the data for Station 10 and Station 19, have been removed from the above table. Non-emergency transfers count only for the EMS Unit that completed the transfer. We responded on Mutual Aid 3 times to Bonner Springs.
